

# Dual Fluid Level Monitor

## LevelCheck

A dual or quad function fluid level warning system that is used to aid the 103 inspection on mobile plant.

Note: This is a pre start level check system only

### BENEFITS

- Provide safe method of checking fluid levels
- Reduce 103 inspection time
- Reduced potential for component failure

MODEL: ELA20X

### FEATURES

- Compact Design
- Reliable Operation
- Australian Design & Manufacture
- Standard DT Deutsch Connector
- Dual Low & High Levels
- Quad Low Fluid Levels
- Backlit LED Display

### SPECIFICATIONS

Voltage ..... 24V

Standby Current ..... 10.5mA

Operating Current ..... 190mA

### Typical Installation Schematic
